

Spear[®]-T is an insecticide solution by Vestaron[®] that controls four of the major greenhouse and nursery pests — aphids, spider mites, thrips and whiteflies — as effectively as conventional insecticides, and with the safety and sustainability of biologicals. With an excellent safety profile for pollinators and other beneficials, Spear-T also has a short 4-hour restricted-entry interval (REI), 0-day pre-harvest interval (PHI), and is MRL exempt. The combination of these characteristics makes Spear-T a valuable new tool for greenhouse and nursery pest management, as well as a safe and versatile rotation partner in integrated pest management programs.

An MRL exemption indicates residue levels on food are not required to be measured or enforced when the product is used as directed by the label.

A short Restricted-Entry Interval (REI) provides flexibility and desired worker safety profiles.

Spear-T can be applied and crops can be harvested within the same day, providing a tool that allows growers flexibility in the field.

Spear-T works on a unique neuromuscular receptor qualifying as the first product in IRAC Group 32.
