

Always read labels and follow label instructions carefully.

Shake all liquid containers before adding to the mix tank to ensure thorough mixing.

Fill tank 2/3 full of water **before adding any pesticides**. Do not add Spear RC to the mix tank before introducing the desired amount of water.

Start mechanical/hydraulic agitation before adding Spear RC.

- 1st: Powder/dry products
 - 2nd: Non-EC liquid products
 - 3rd: Emulsifiable concentrates (EC)
 - 4th: Measure pH - **Adjust the spray solution to pH 5-7 as needed**
 - 5th: Adjuvants and surfactants
- Always use adjuvant and/or surfactant to improve spray coverage.

Maintain circulation while loading and spraying solution.

Apply 2 pints Spear RC per acre with a low label rate of a Bt-product (we recommend Leprotec at 1 pint/A) to control lepidopteran larvae. Check the label or contact a sales representative for the suggested application interval.
